INCLUDED ITEMS

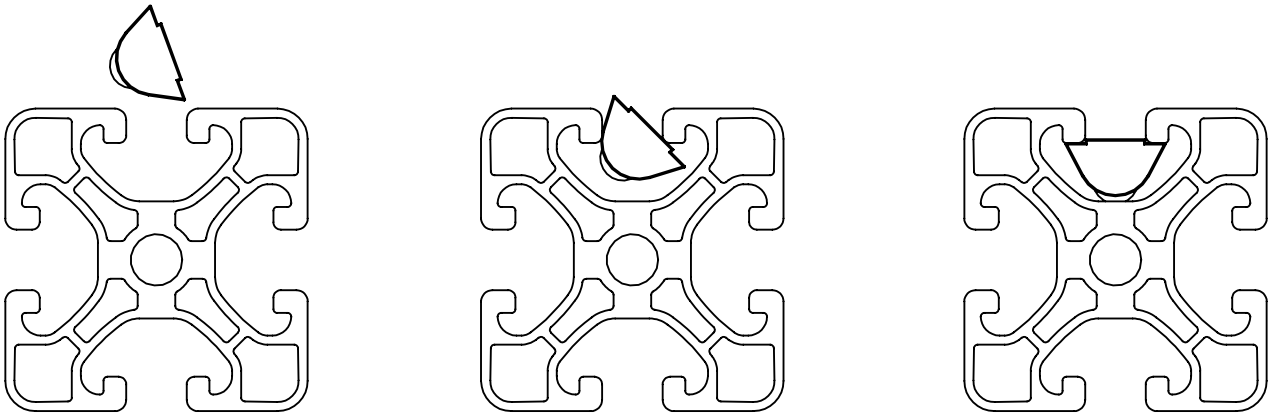
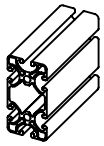
WHEEL MOUNTING	
M8x16 (Sunken Head)	4
M8 T-Nut Click-in-Nut	4
Wheel mount option specific set of bolts.	1

RUBBER FEET	
M5x12 (Socket Heat)	4
M5 T-Nut Click-in-Nut	4
Rubber Foot	4

GENERAL INSTRUCTIONS

The easiest way to mount the T-Slot Click-in-Nuts, is to slide them in from one side of the profile, with the ball facing down. But don't worry if you need to put in a click-in-nut in a profile which has both ends already closed: it is also possible to push them in the T-slot anywhere you like!





8040 L=1170

2x

Rubber Foot

4x

M5x12

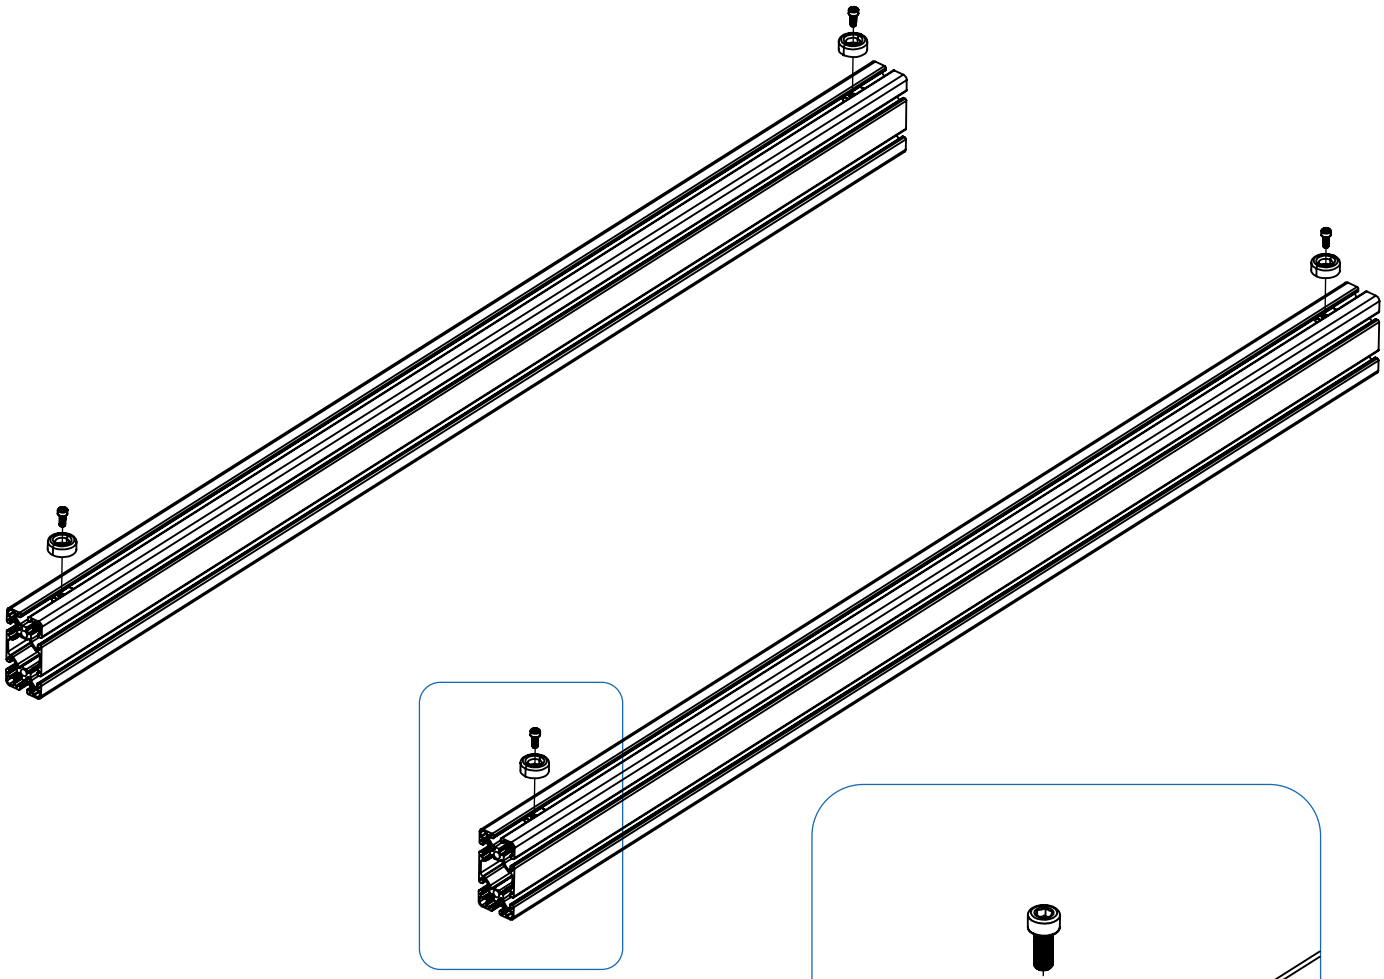
4x

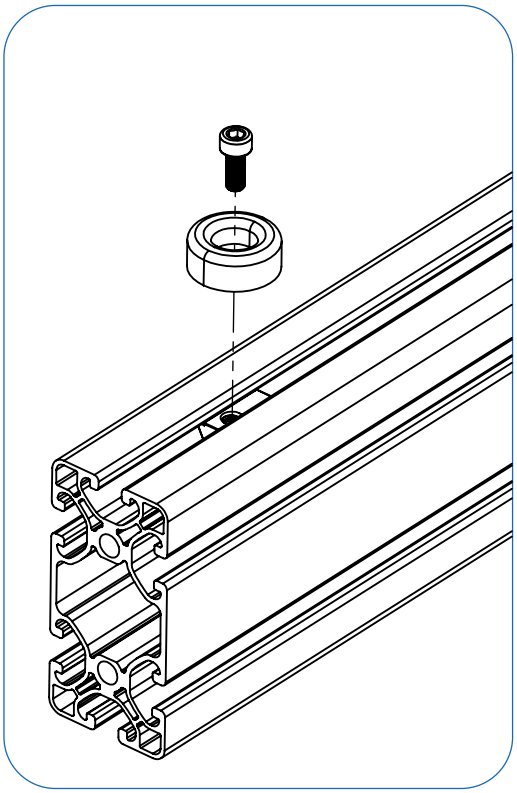
M5 T-Nut

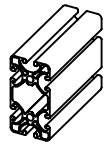
1x

1

Mount the Rubber Foot to the bottom of the longest profiles.

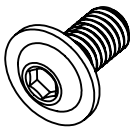






8040 L=500

2x

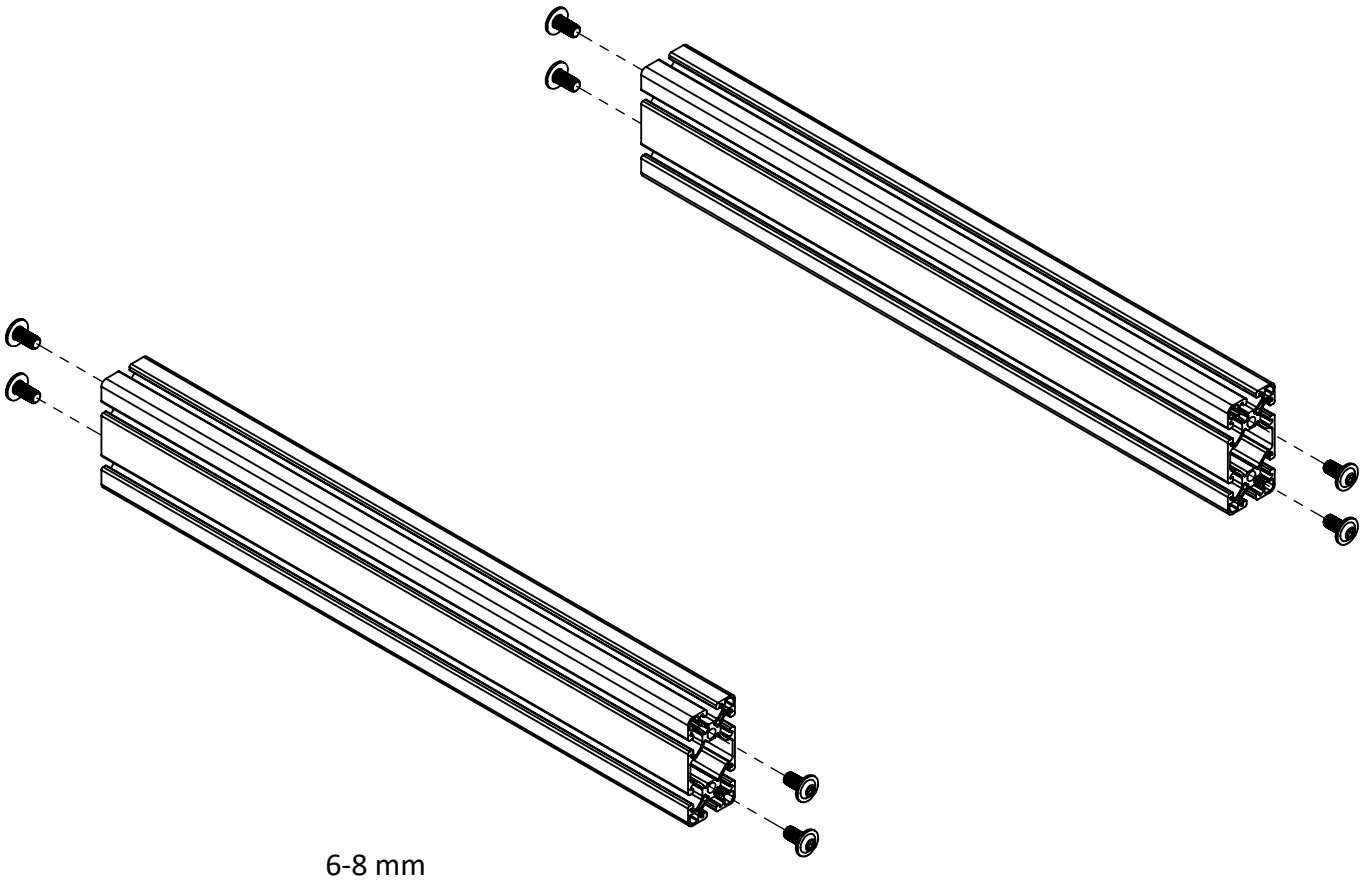


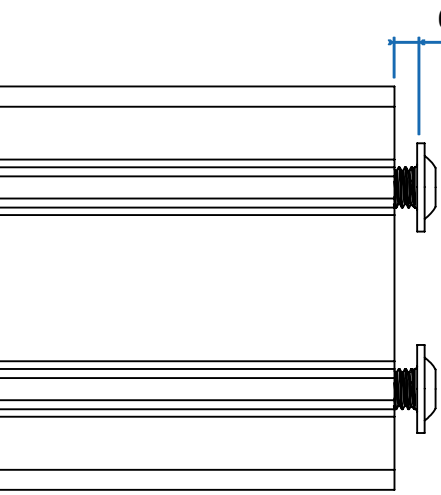
M8x16 Flange

8x

2

Screw the M8x16 flange nuts halfway into the profiles by hand. Make sure to leave around 6 to 8 mm of space between the head of the screw and the profile.





This does not need to be precise. You will tighten these bolts in a later step.

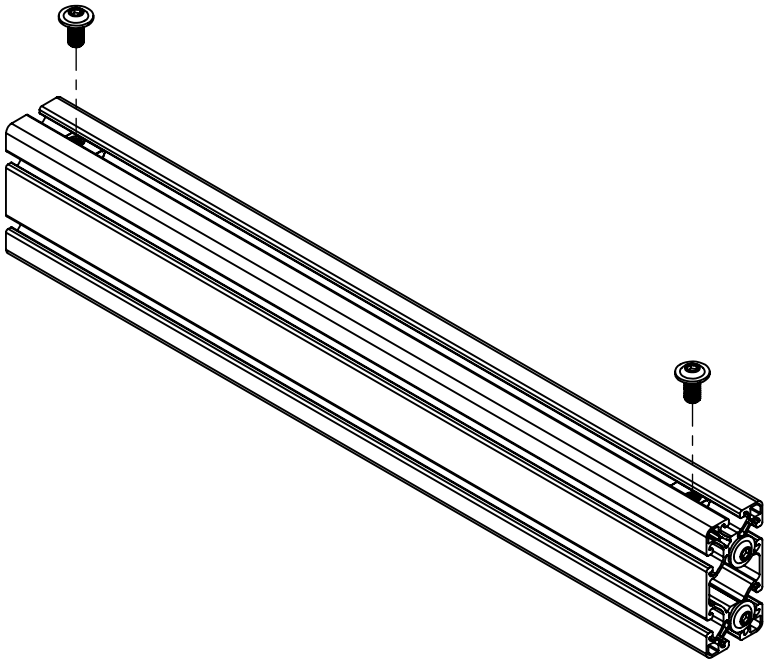
M8x16 Flange

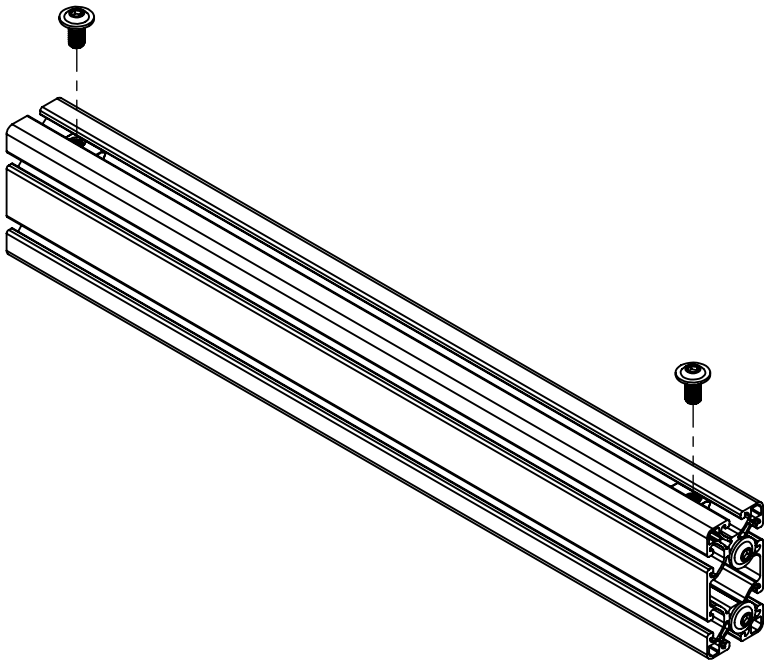
4x

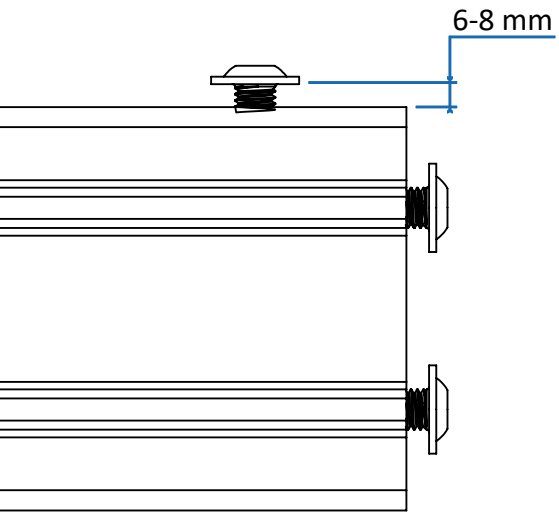
M8 T-Nut

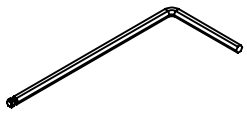
4x

3







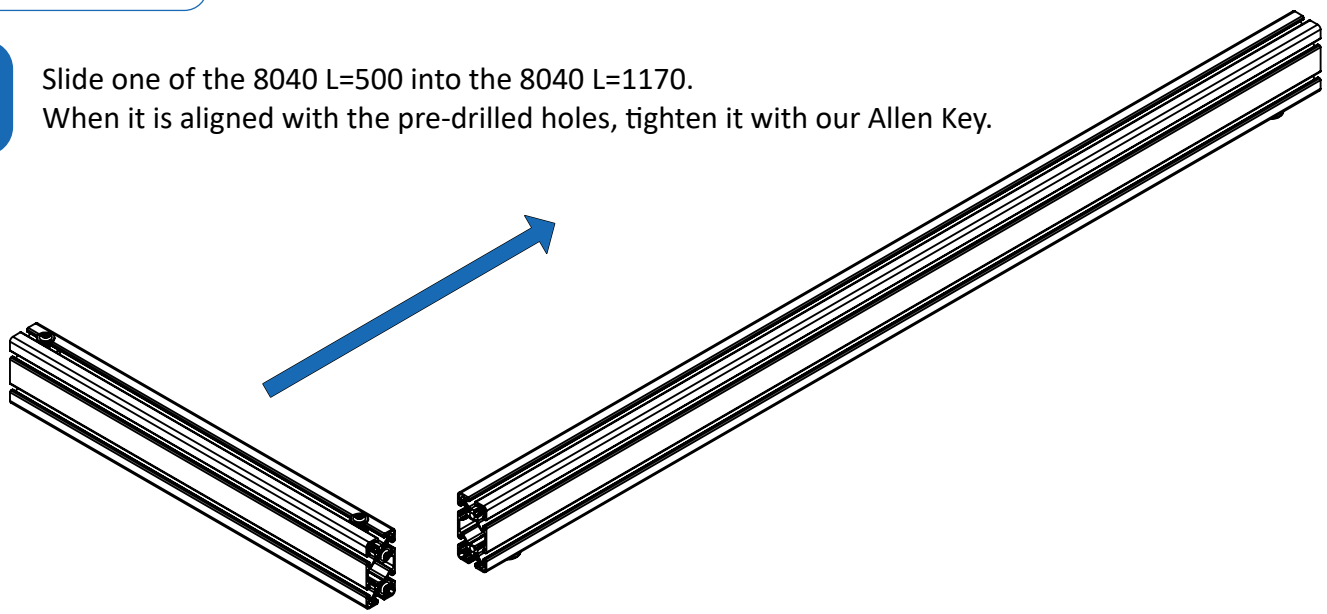


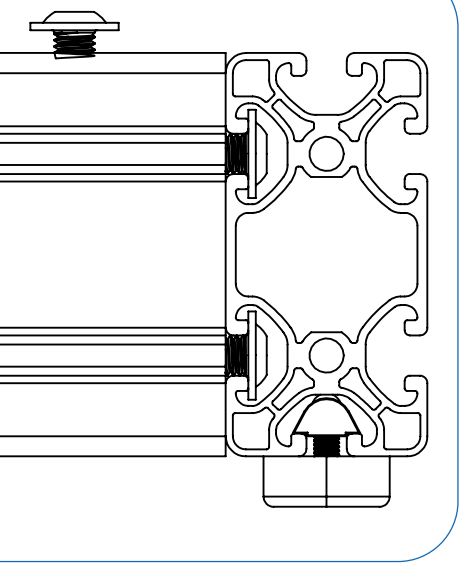
Treq Allen Key 5mm

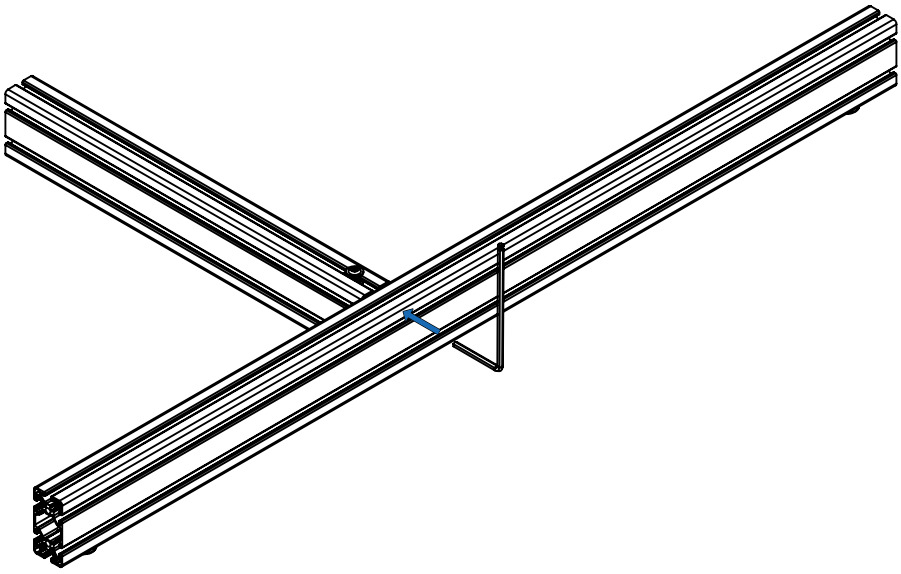
1x

4

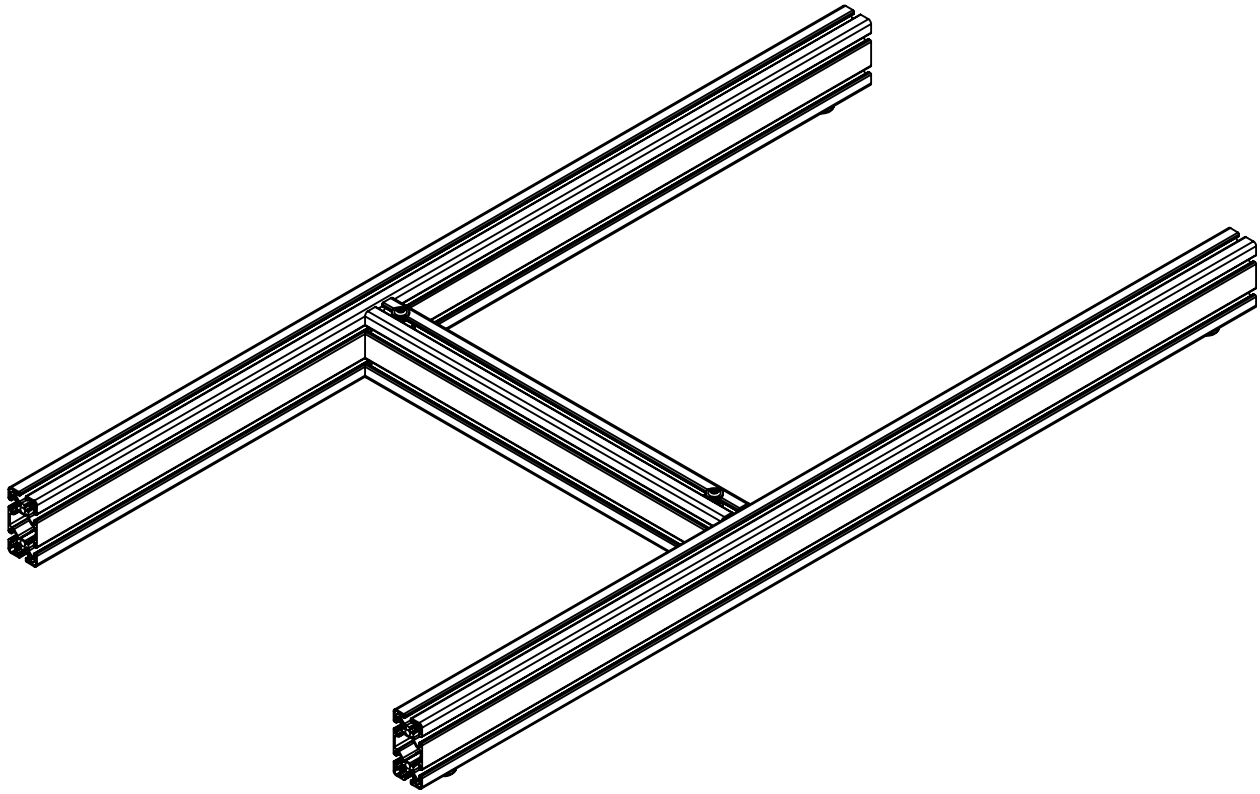
Slide one of the 8040 L=500 into the 8040 L=1170.
When it is aligned with the pre-drilled holes, tighten it with our Allen Key.



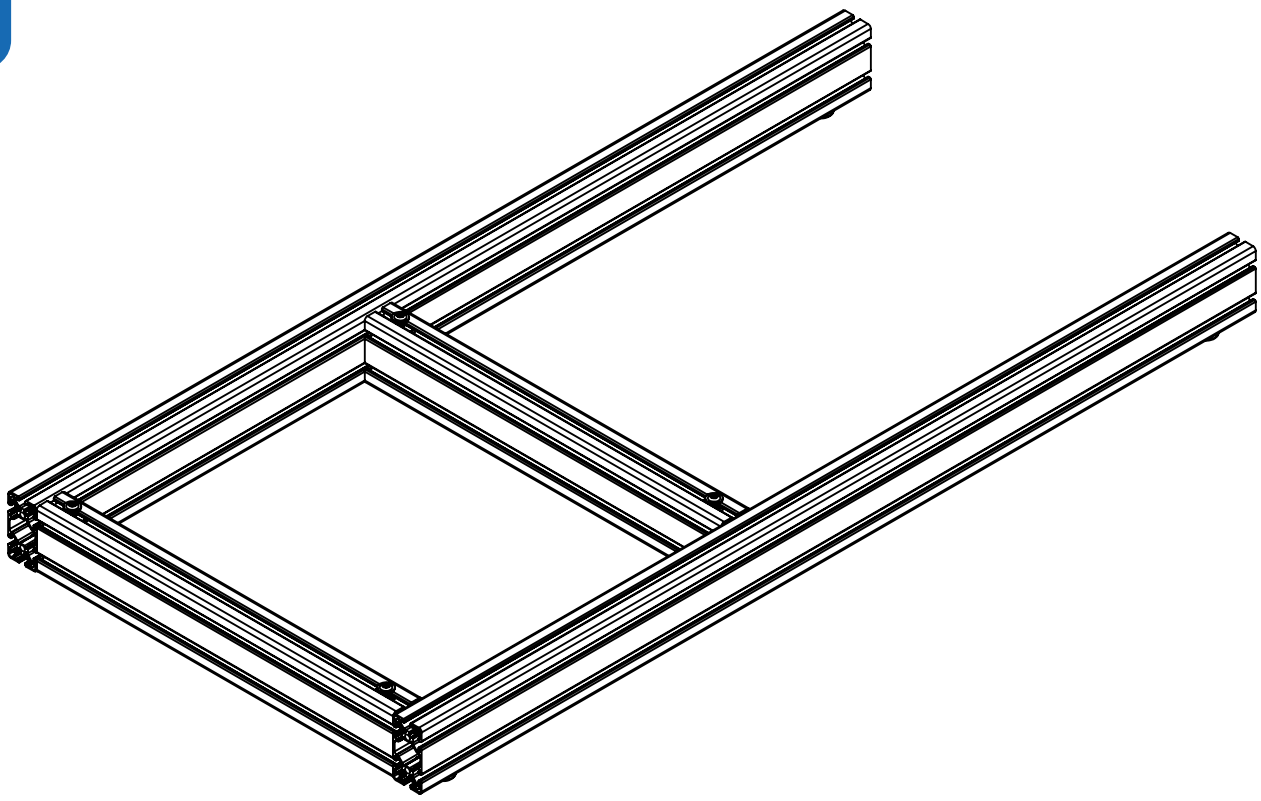


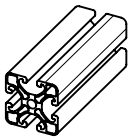


5



6

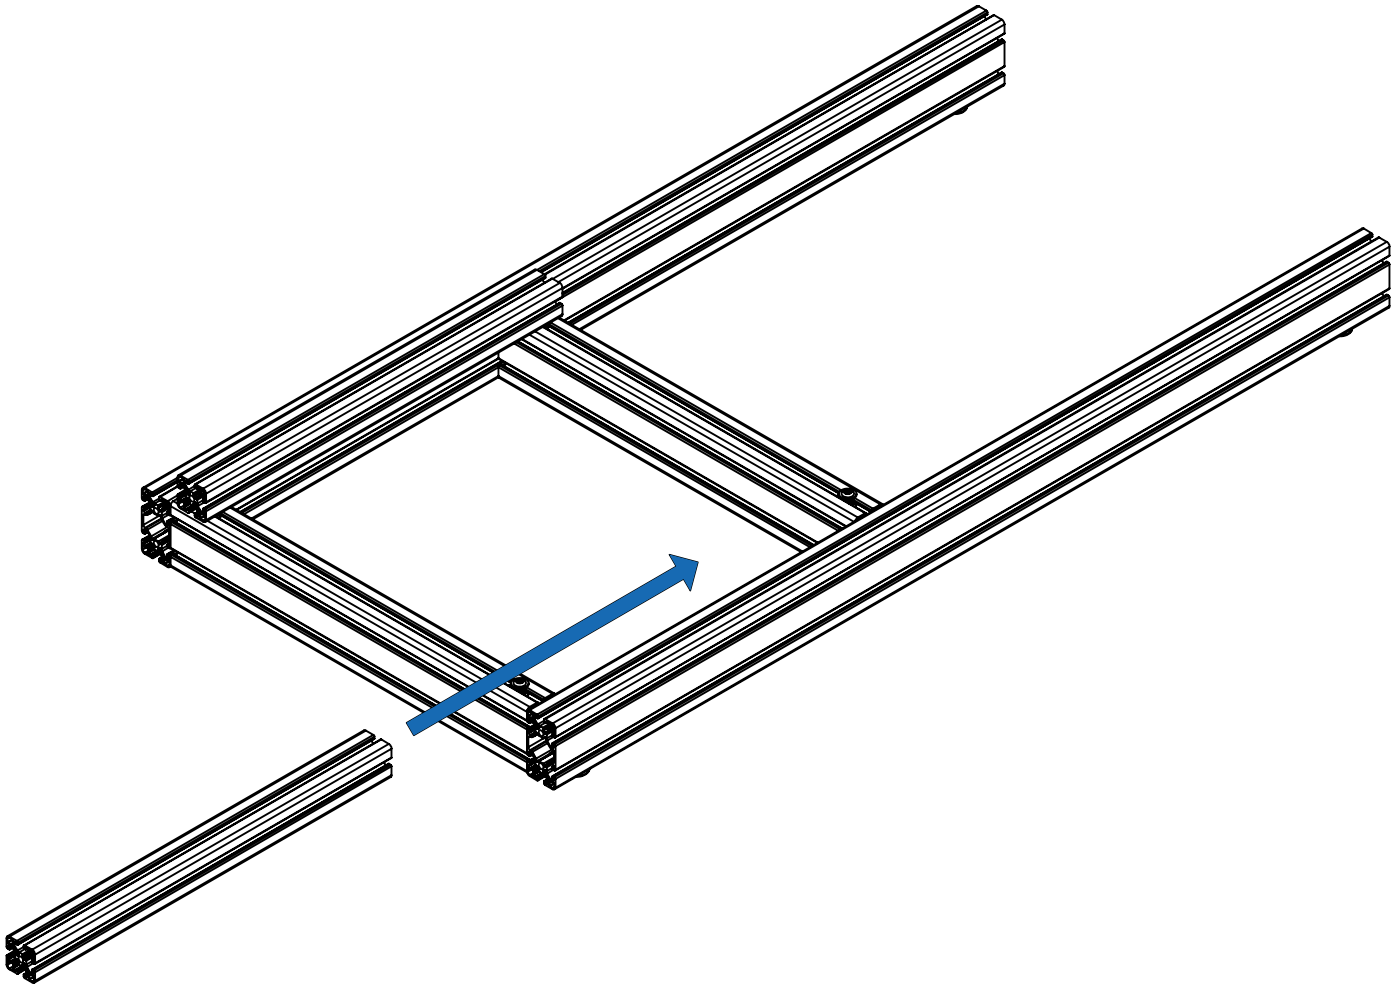


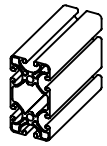


4040 L=500

2x

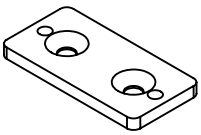
7 Slide the two 4040 L=500’s onto the rig and thighten them.
You might need to adjust this later on, depending on the width of your seat.





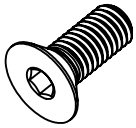
8040 L=580

2x



Upright Connector

2x



M8x20

4x

M6x16

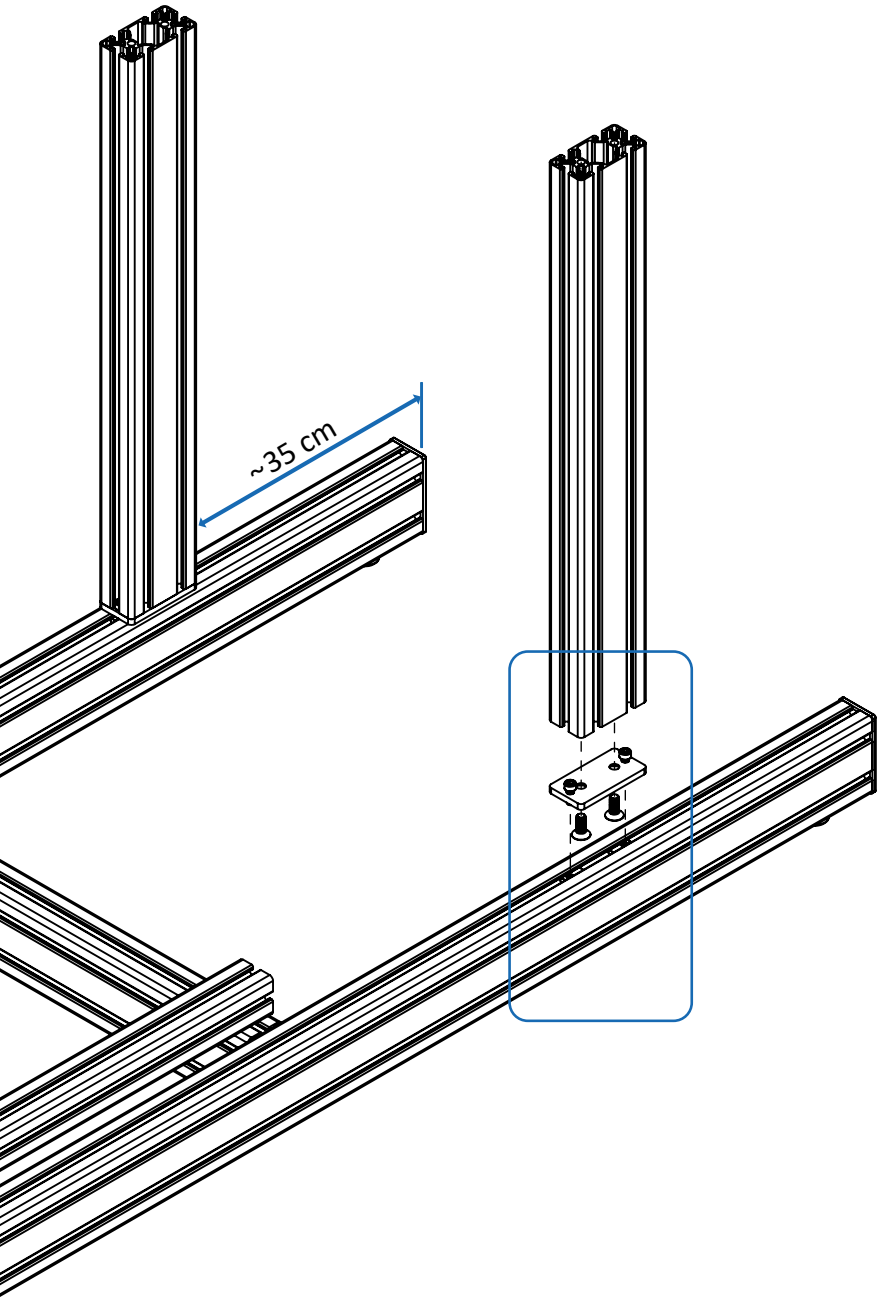
4x

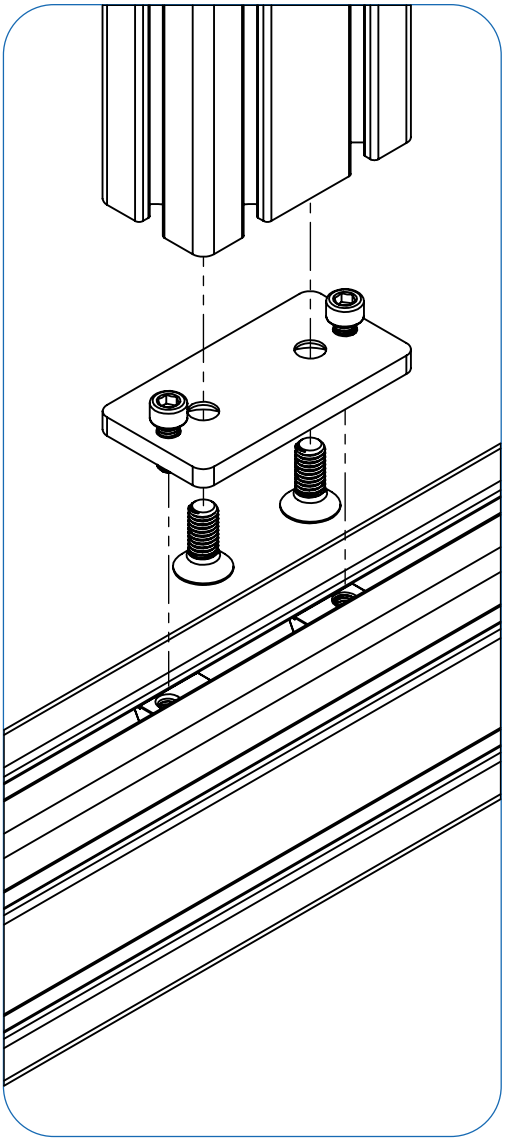
M6 T-Nut

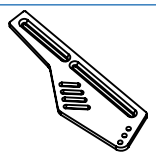
4x

8

Mount the 8040 L=580's using the Upright Connector Plates. You must insert the M6 screws into the plates first, before securing them with the M8x20's. If they fall out, you can insert them again from the top of the profiles.







Pedal Bracket

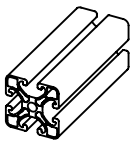
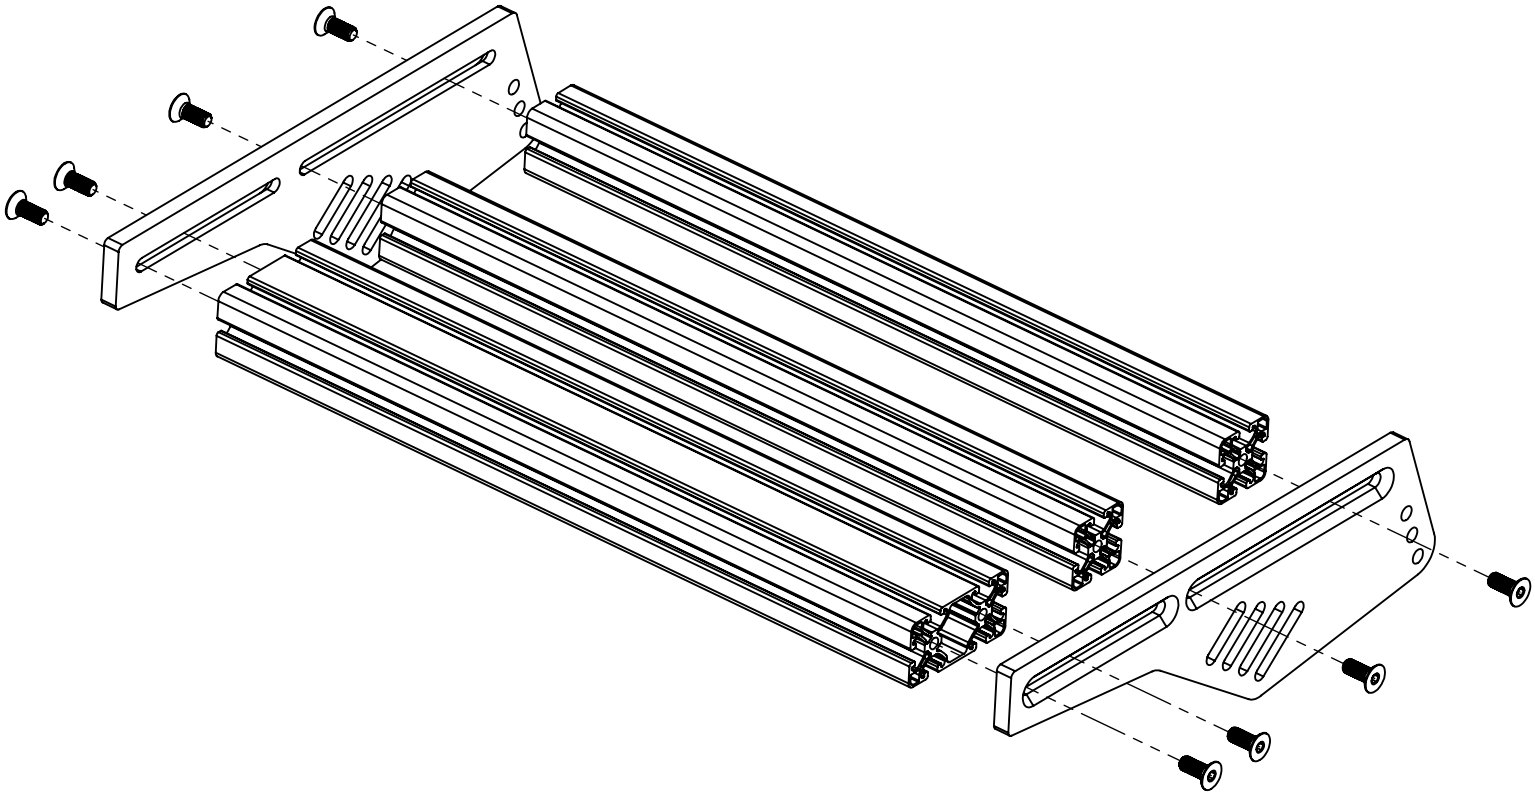
8040 L=478
1x

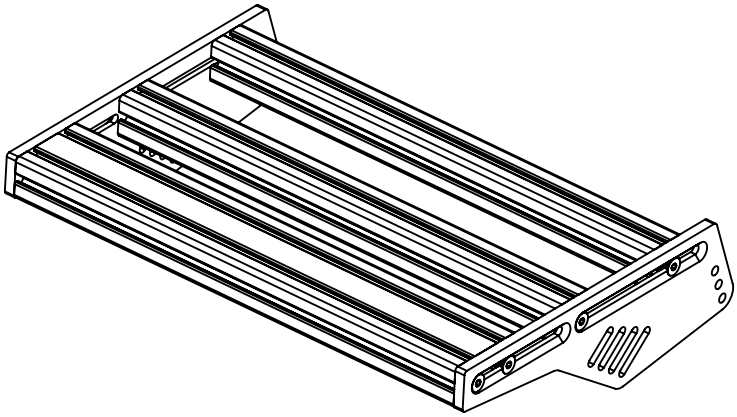


4040 L=478
2x

M8x20
8x

9





M8x20 Flange

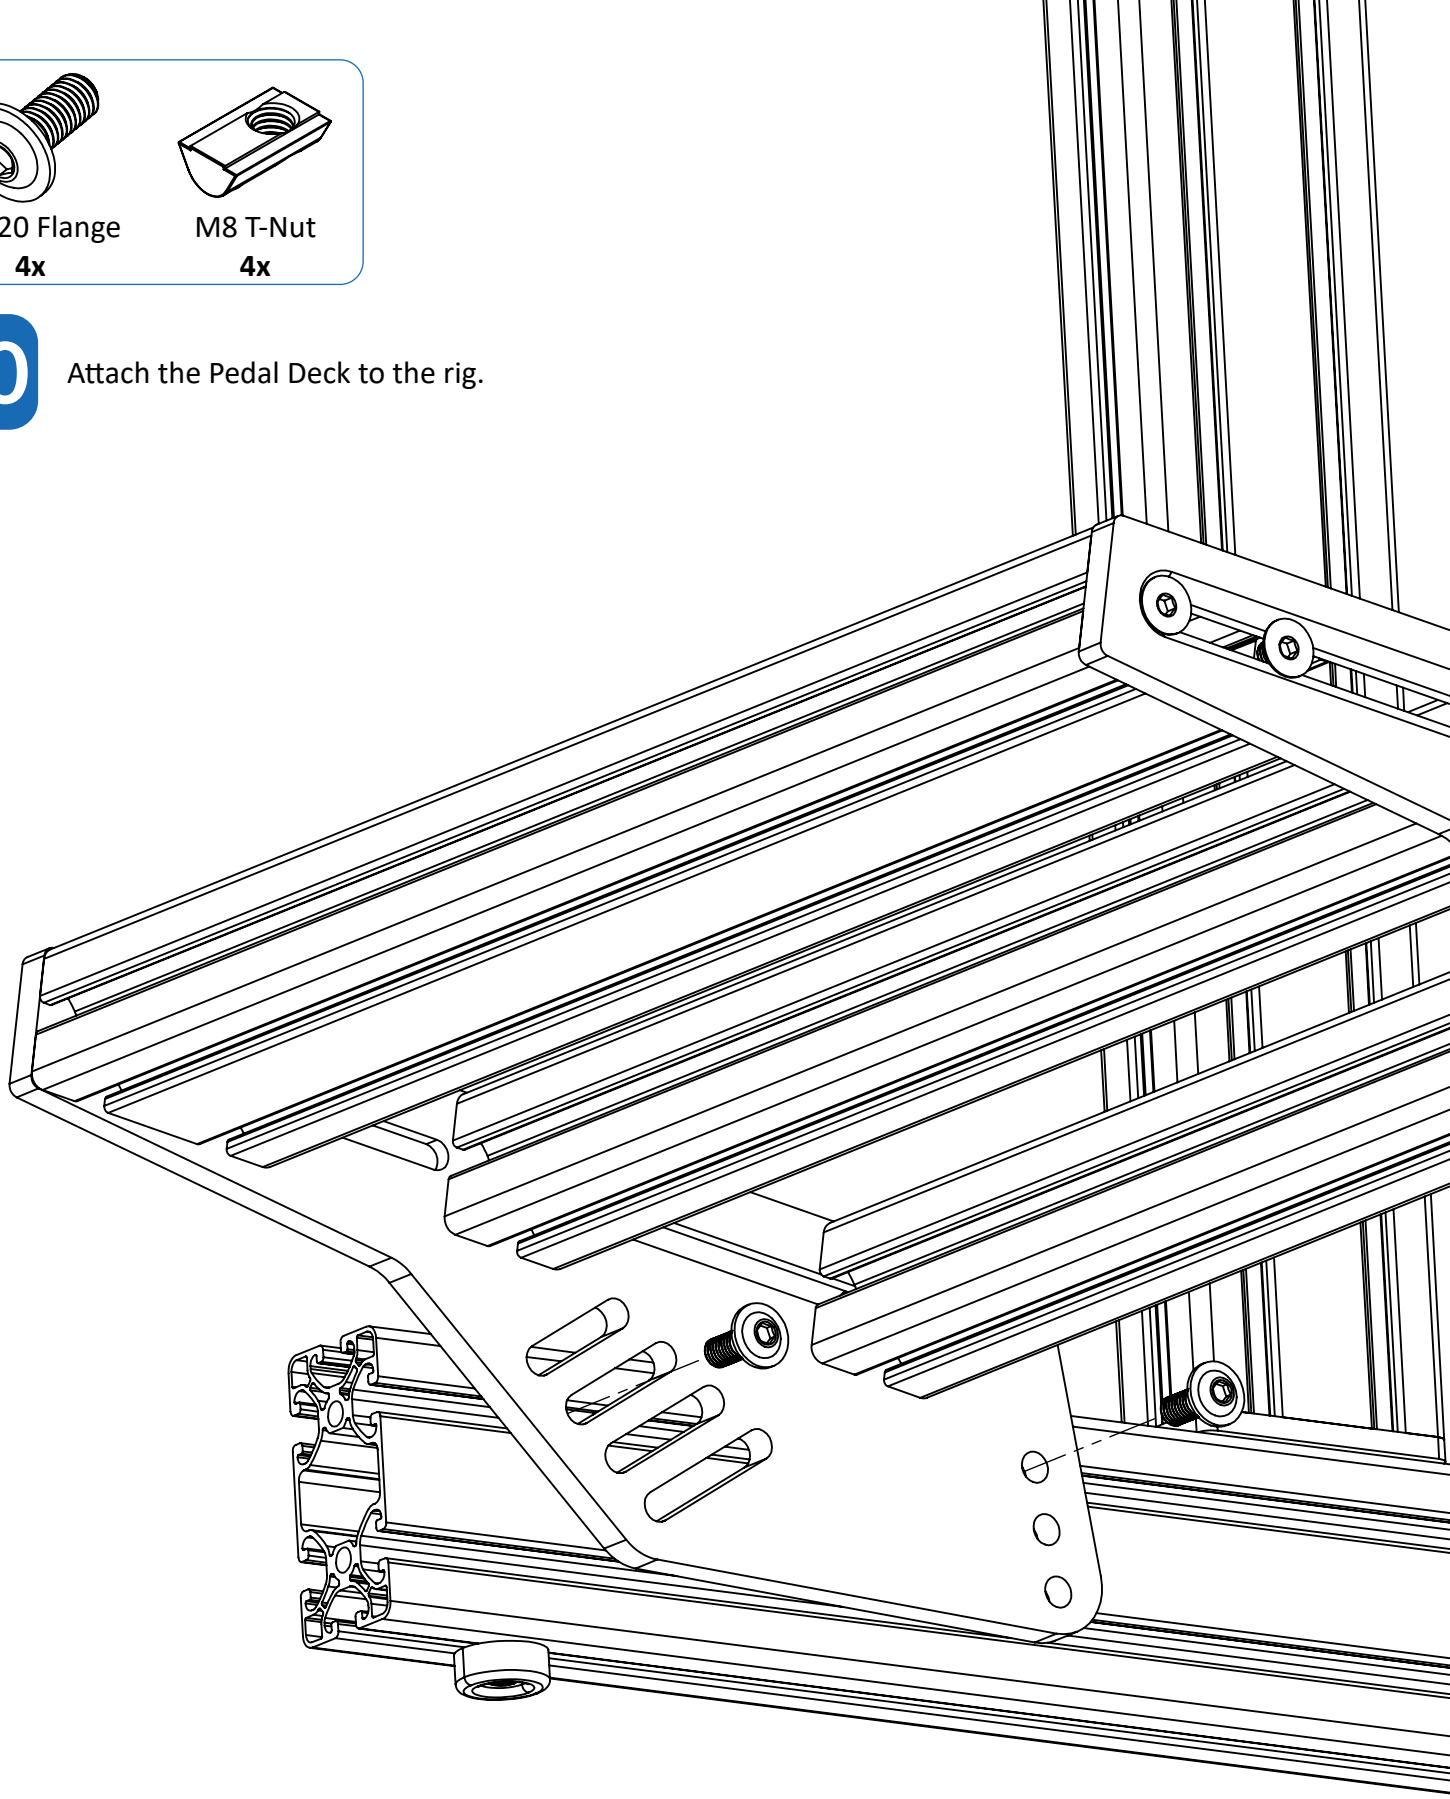
4x

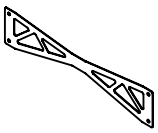
M8 T-Nut

4x

10

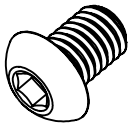
Attach the Pedal Deck to the rig.





Bow Tie
1x

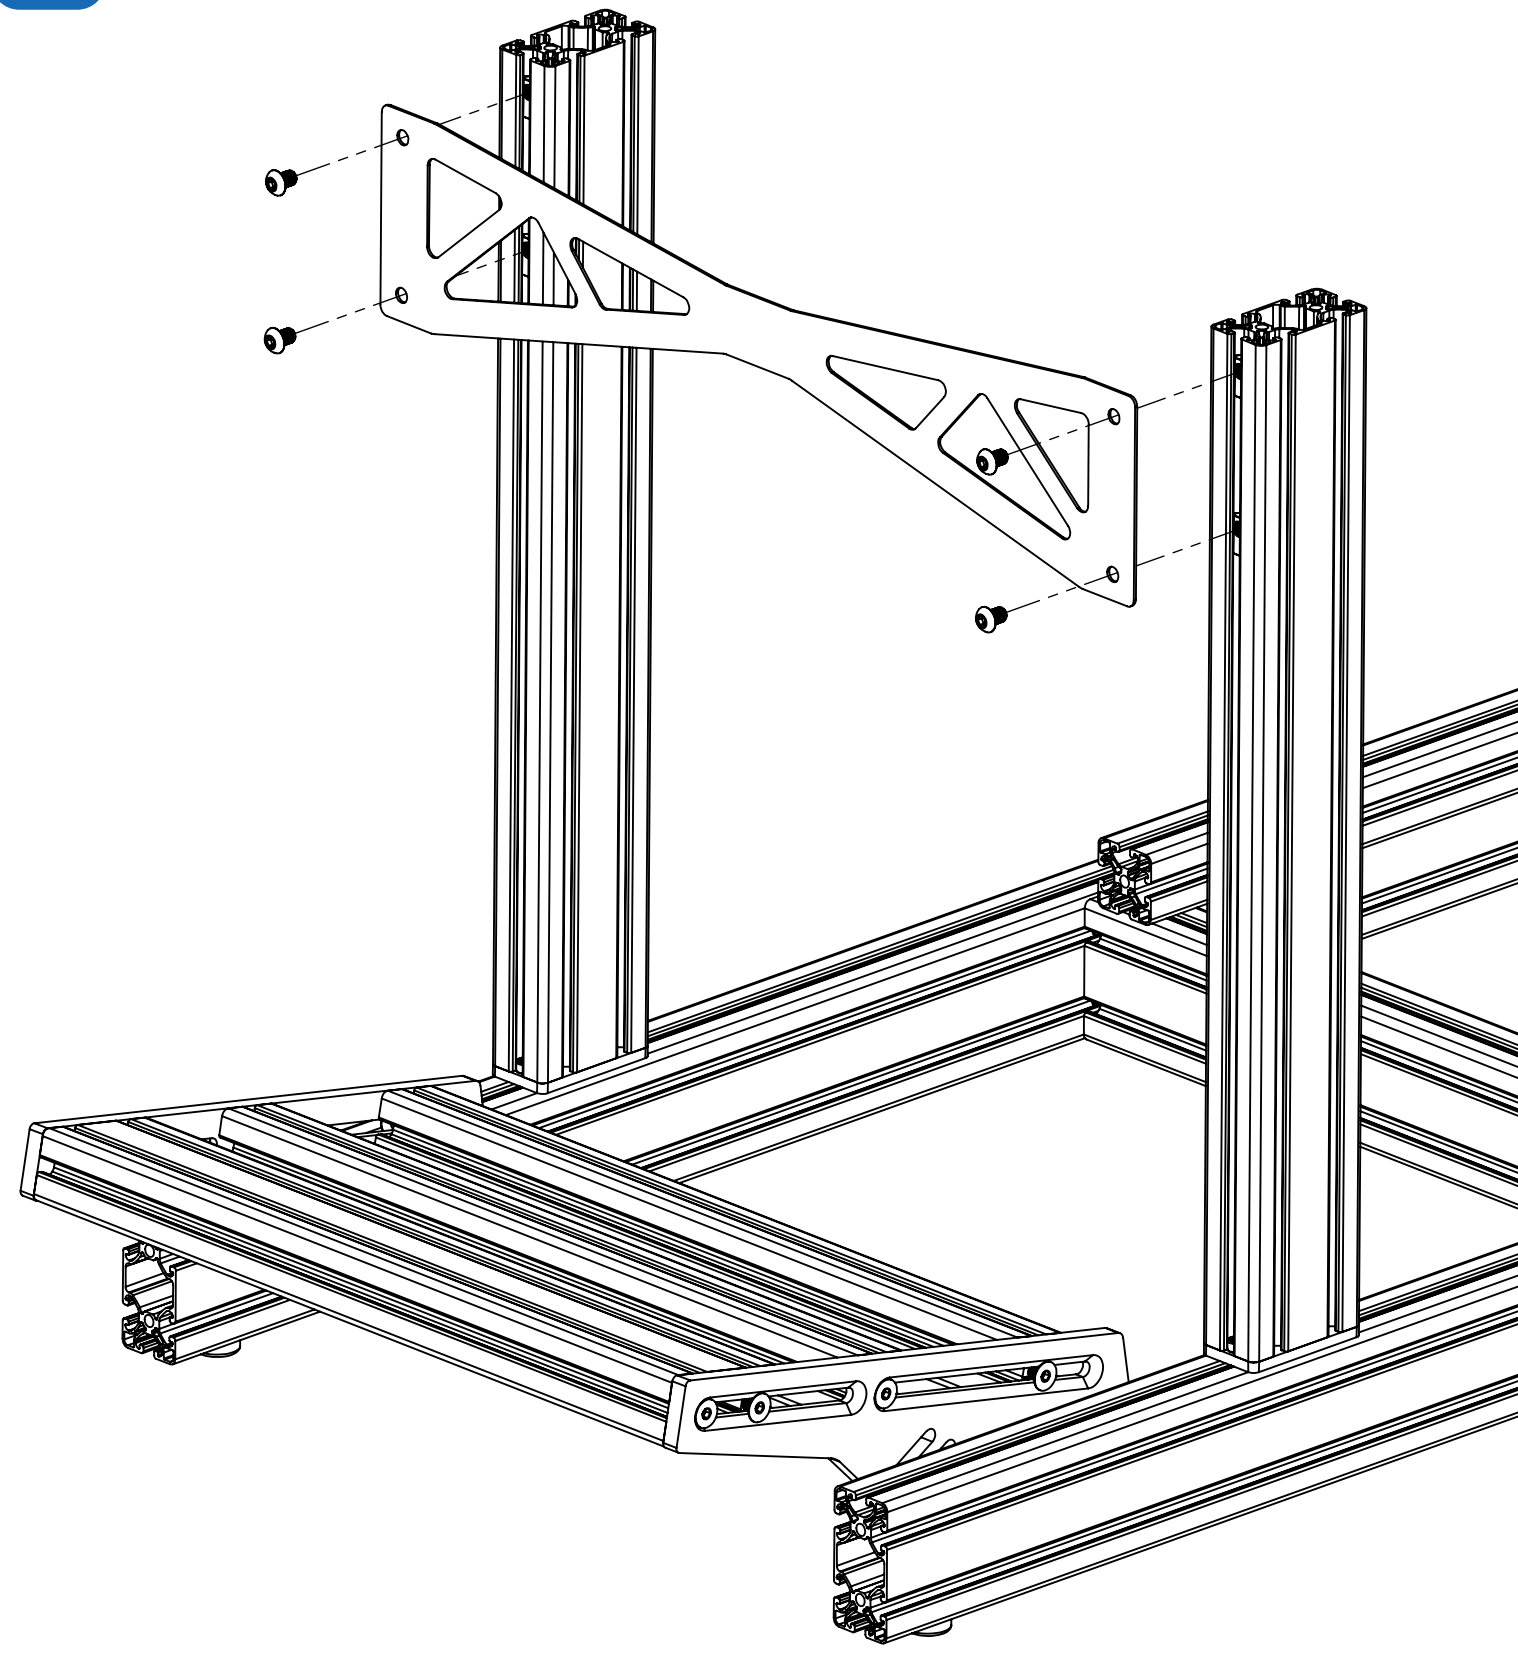
M8 T-Nut
4x

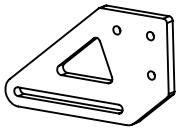


M8x12
4x

11

Attach the Bow Tie to the rig.





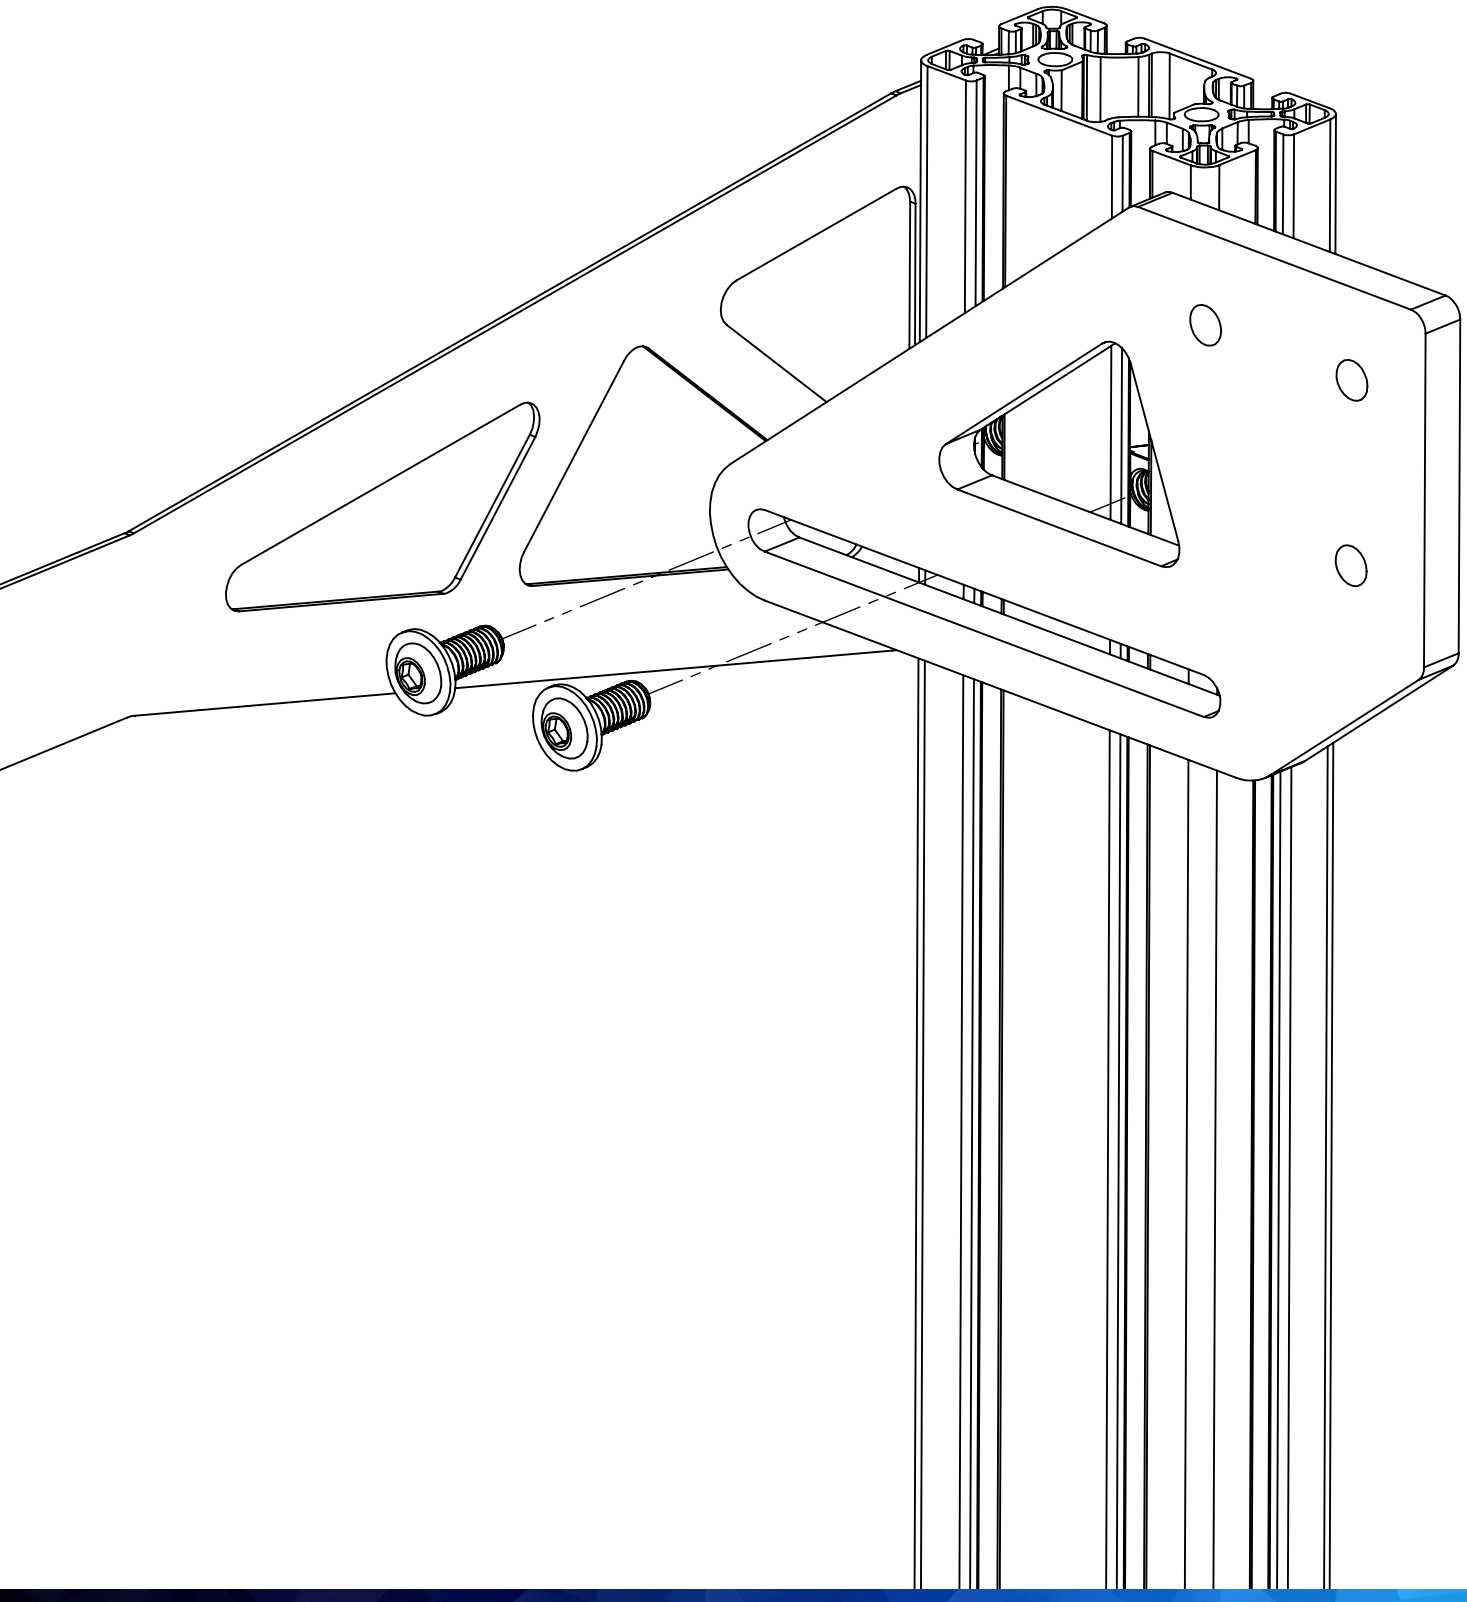
Side Mounting Plate
2x

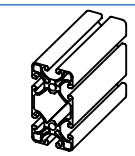
M8x20 Flange
4x

M8 T-Nut
4x

12

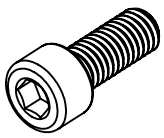
Attach the two Side Mounting plates to the 8040 L=580's of your simulator.





8040 L=150

2x

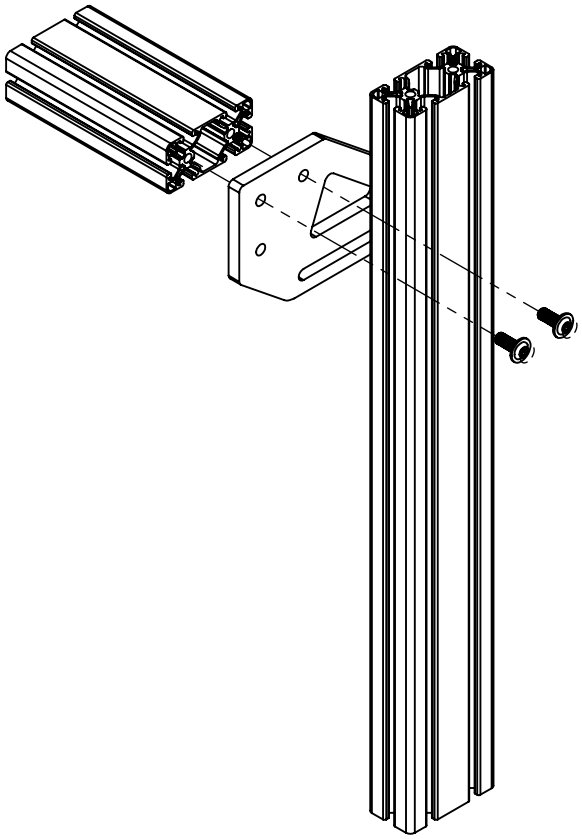


M8x20

4x

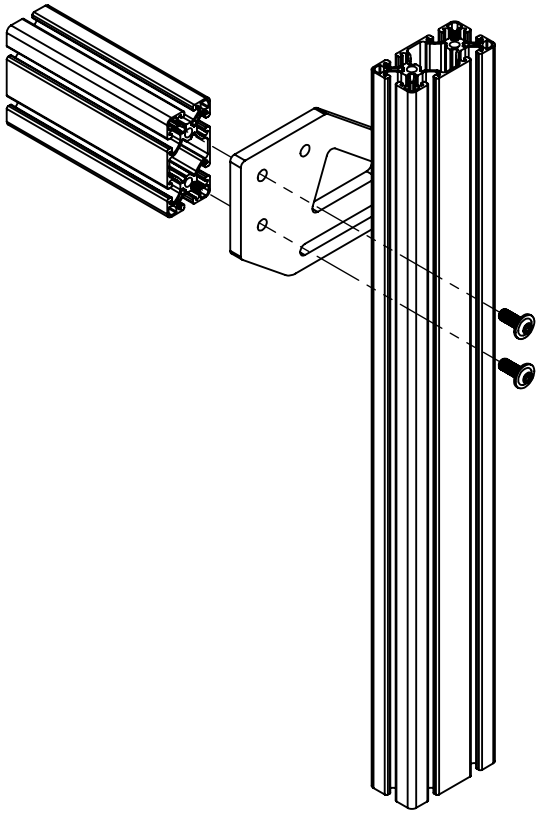
13a

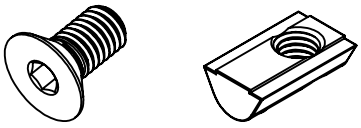
Mount the 8040 L=150 profiles like this for the Wheel Deck.



13b

Mount the 8040 L=150 profiles like this for Front or Side Mount.



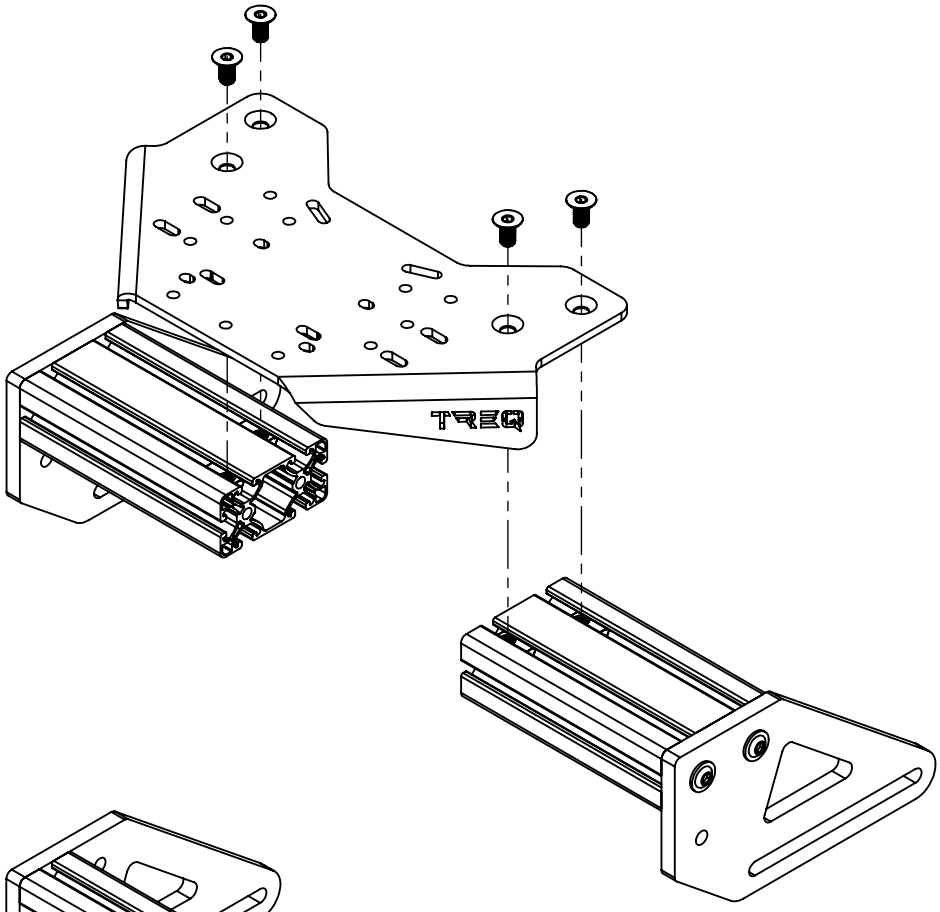


M8x16
4x

M8 T-Nut
4x

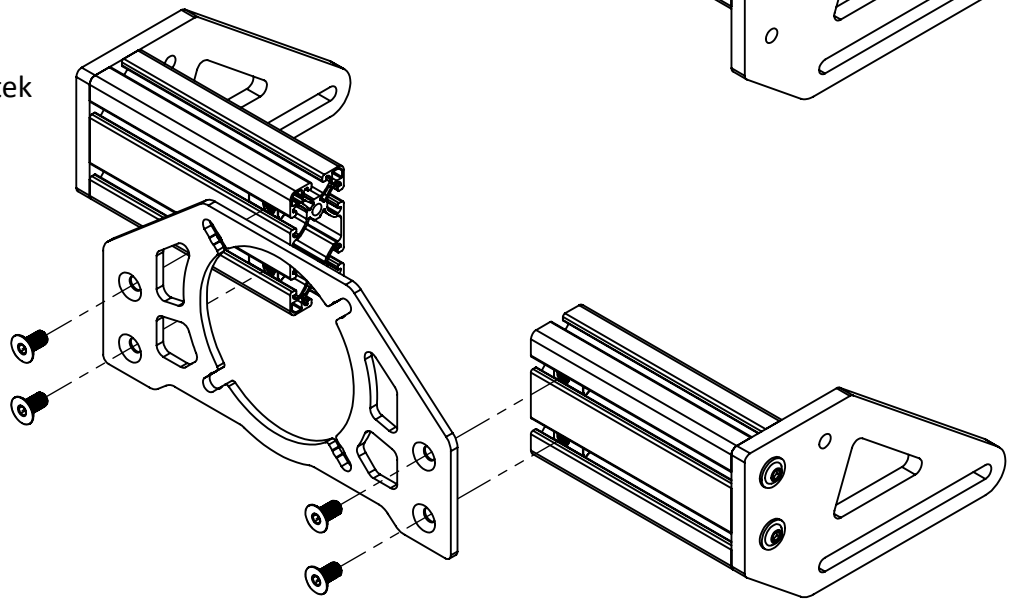
14a

Wheel Deck.



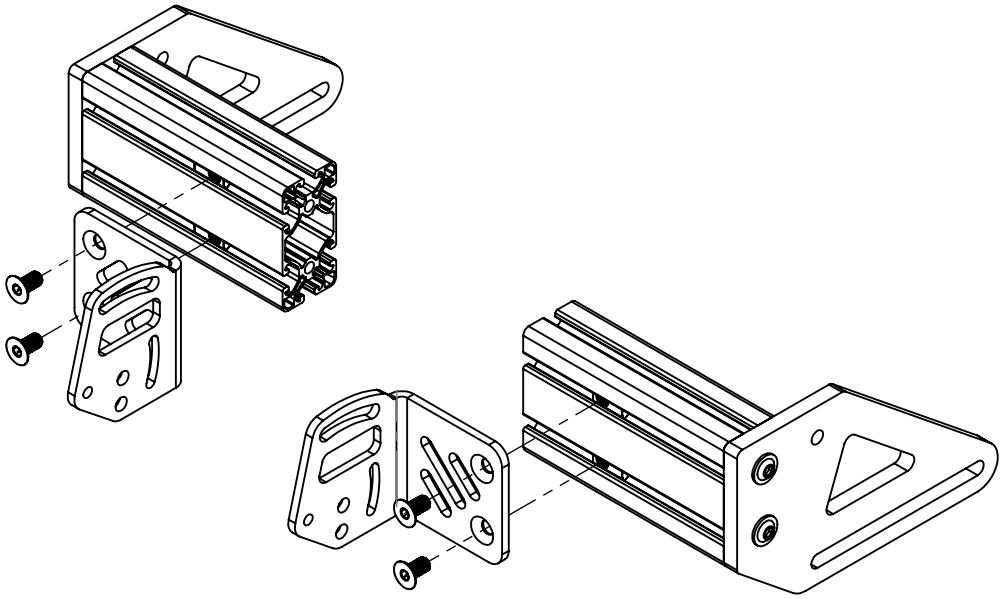
14b

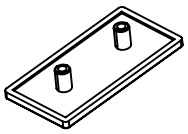
Simucube / MOZA / Asetek
Front Mount.



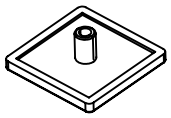
14c

Side Mount.



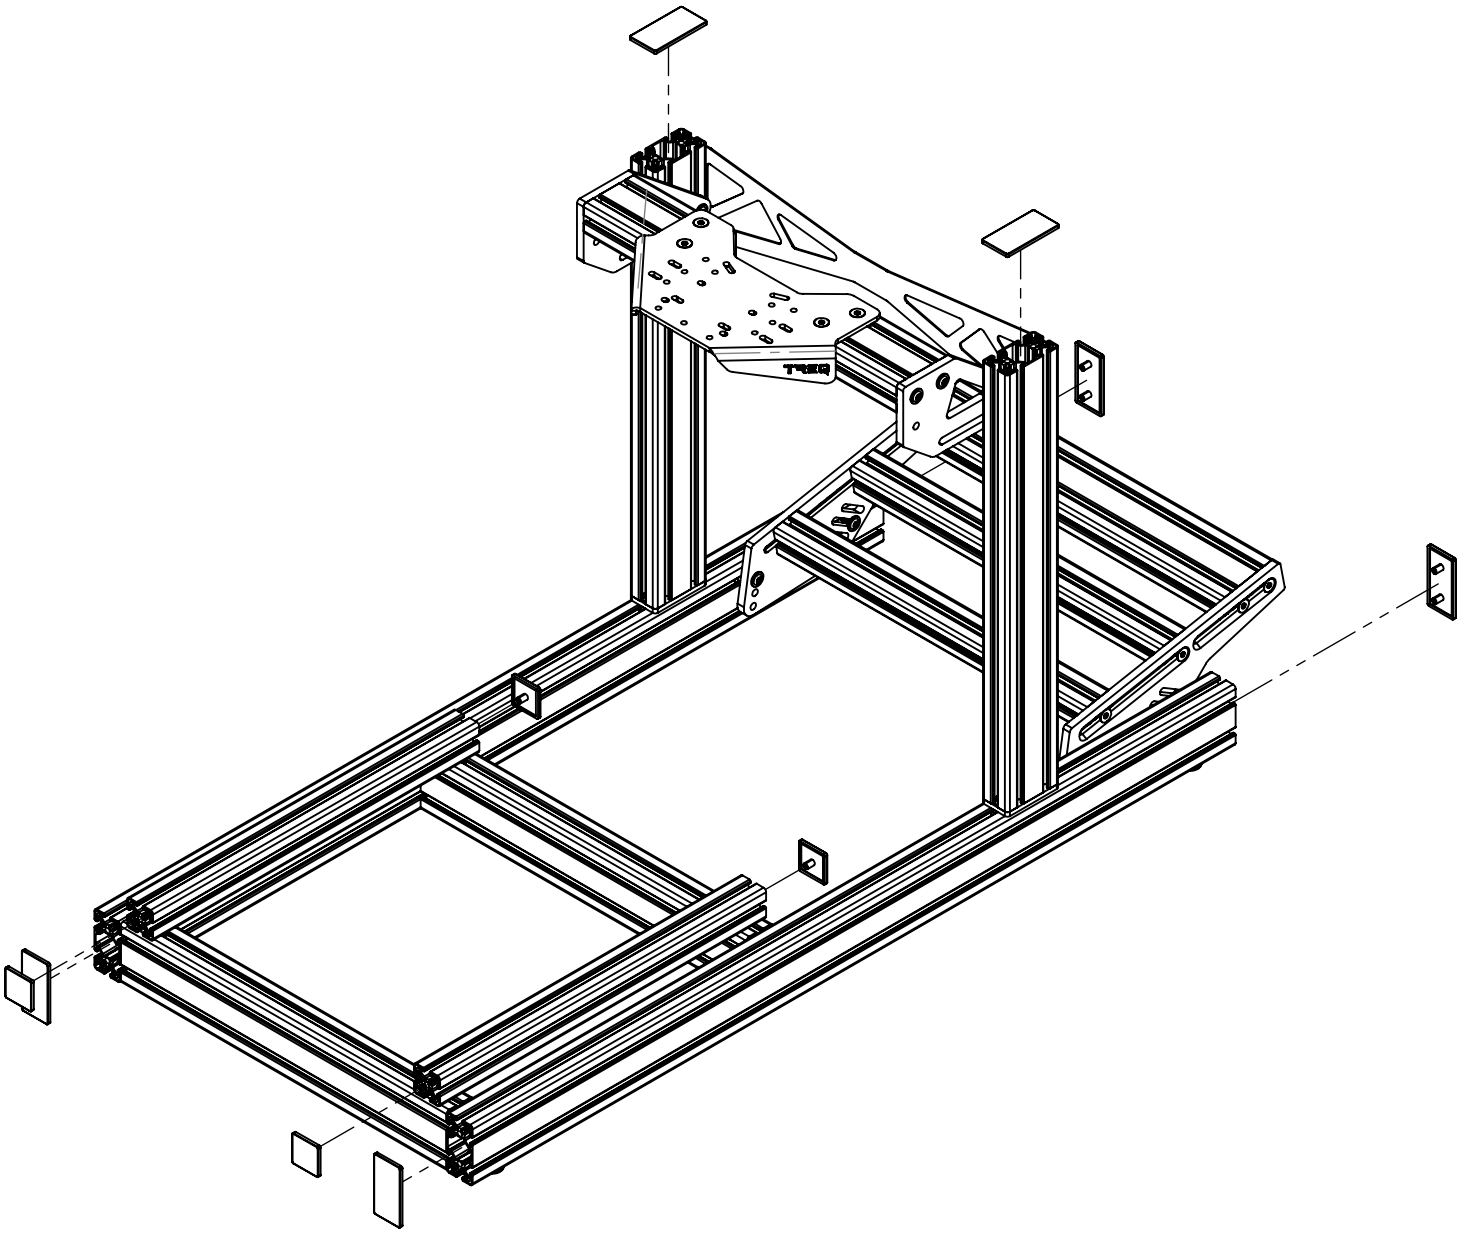


Cover 8040
8x



Cover 4040
4x

15 Place all cover caps on the open ends of the profiles.



16

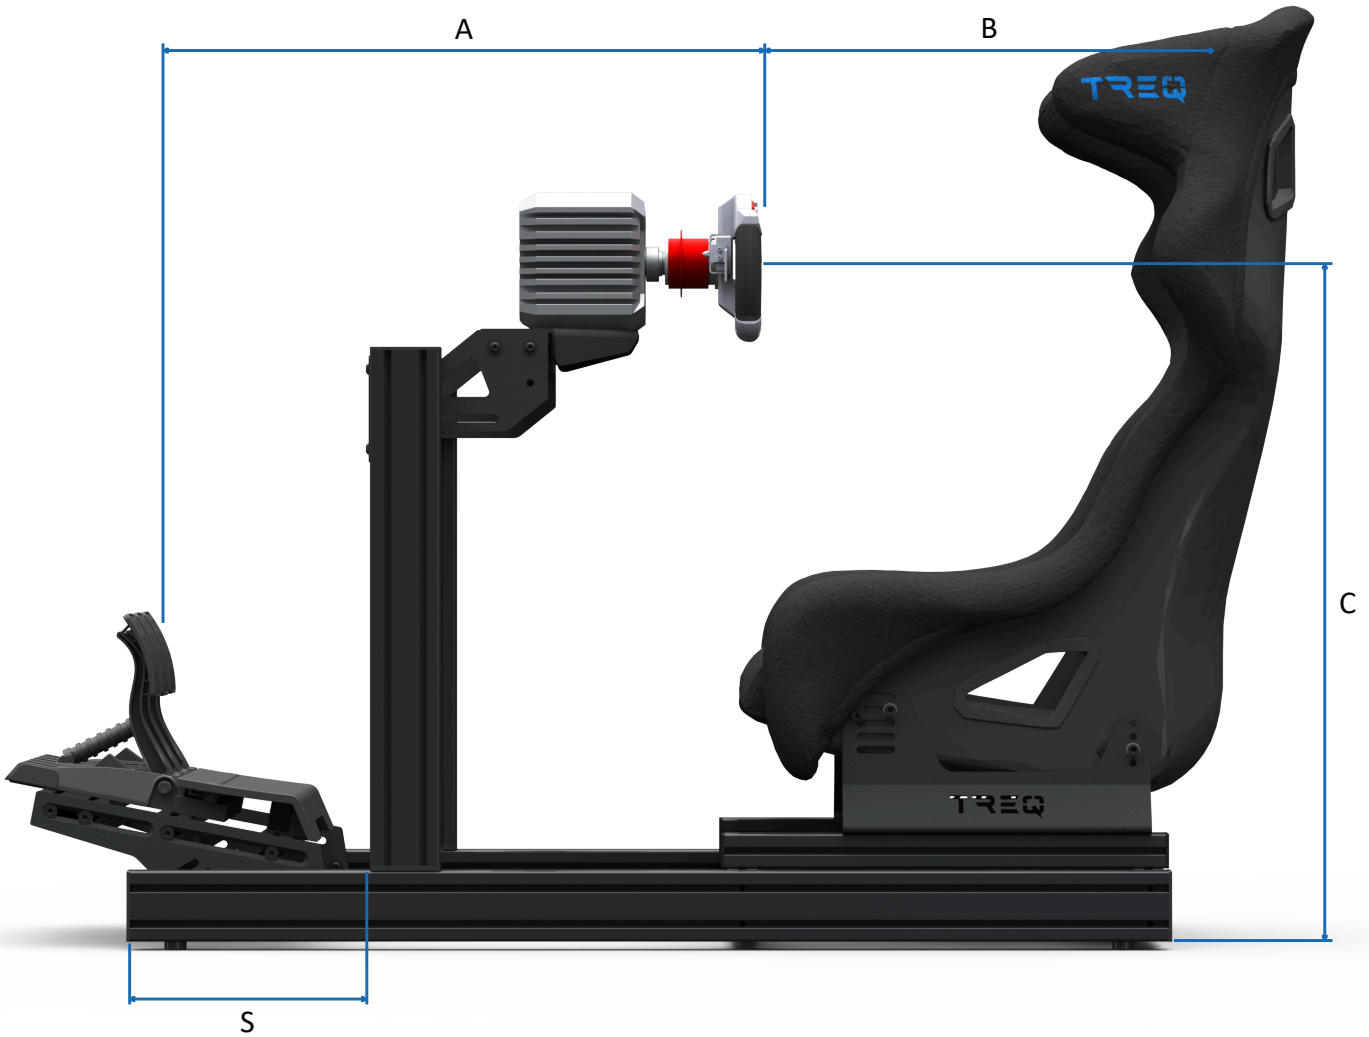
Setting up your rig in the perfect way can take a lot of time and adjustments. Everybody is different, and with the enormous amount of sim racing gear available, it is impossible to draw you the perfect seating position. But this page should help you when tightening all the bolts for the first time. After you've build it up like this, you can then fine tune it to your own preferences.

Body length: 160 cm
A: 50 cm
B: 60 cm
C: 65 cm

Body length: 180 cm
A: 55 cm
B: 65 cm
C: 70 cm

Body length: 200 cm
A: 60 cm
B: 70 cm
C: 75 cm

When first building your rig, we recommend putting S on 35 cm. Don't tighten the bolts of the steering rack too much, 'cause there is a big chance you're going to adjust it after you mount a steering wheel.



QUESTIONS & COMMENTS

If you have any questions about building our products, missing items, or mistakes in this manual, please contact us! We reply quickly via our email info@treq-sim.com, and this is the #1 way to go if your question involves personal information. Need help from our community? LEAVE A REVIEW

Now that you are done building it is a great time to share your experience with us and even more importantly, other fellow sim-racers!

Recommending us to friends, or leaving a review on your preferred website and letting other people know what you think of us, would help us a lot! We are a small company that has its main focus on creating and delivering great products and helping customers quickly, and not on advertising and marketing.

Kind regards, team Treq
